Office Action Summary	Application No. 09/920,728	Applicant(s) TRIBE ET AL.	
	Examiner MATTHEW F. DESANTO	Art Unit 3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The 11 Rejection has been withdrawn because of the amendments to the claims and applicant's remarks.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 7, 9, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Stern et al. (USPN 5,232,449).

Stern et al. discloses a method of using a syringe pump with a force sensor ("detector") that directly detects the force on the plunger, and wherein Stern et al. discloses responding to a force (Column 1, line 60 – Column 2, lines 15) and sounds an alarm when the "detector" reaches a threshold value and thus stops the pump (Column 9, line 9-60).

The examiner is interpreting that by stopping the pump the direction of the force being applied is changed because the direction of force applied to the plunger has ceased and thus changes the direction of the force and meets the claim limitation.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stern et al.

Stern et al. discloses the invention substantially as claimed because Stern et al. discloses that upon occlusion detection by the sensor, and changes the movement and force of the plunger. However, Stern fails to specifically disclose the pump being arranged to change and reduce the detected force by substantially 10% of the predetermined value. This predetermined value is deemed matter of design choice, well within the skill of the ordinary artisan, obtained through routine experimentation in determining optimum results.

Allowable Subject Matter

6. Claims 1, 4, 5, 11, 12 are in condition for allowance.

7. The examiner suggestions reciting reversing the direction of the plunger when the force increases above the predetermined value in claim 7, to expedite and move the case in better form for allowance.

Response to Arguments

8. Applicant's arguments filed 1/23/09 and 2/06/09 have been fully considered and are persuasive because of the affidavit filed on 1/23/09.
9. Therefore the rejection based on Ford has been withdrawn.
